

How to re-size the mi-SOS silicone sports range bracelet with a clasp

Now that you have your new mi-SOS silicone clasp band you may be wondering how to resize it to the perfect fit of your wrist. Well, we've got you covered

[Click here for an easy instructional video](#)

[or use the step by step guide below](#)

Step 1.

The band and clasp will arrive to you separated as shown in the image to the right

This photo is showing the underside of the clasp.

Step 2.

You will need to flip open part of the clasp - this allows the band to slide through the clasp.

Step 3.

Once this part of the clasp has been flipped open, you can slide the band through the opening. The band will not slide all the way through, it will only slide a small amount (as shown in the image with purple band)

Step 4.

The part of clasp that was flipped open can now be clamped shut - it is best to try and line the "teeth" on the clasp into the groove on the band. The image below shows the finish product.

Step 5.

When sizing your band to your desired fit, be sure to cut small sections at a time so you don't cut too much.
