

How to measure your wrist

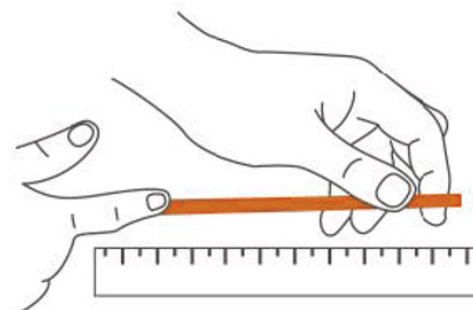

Measure your wrist with measuring tape

When measuring your wrist, wrap the measuring tape as close to your hand as possible, as illustrated in the image to the right.

Don't have a measuring tape?

Use a piece of string to measure your wrist and lay the string back out on a ruler to get your measurement in centimeters or inches.

When ordering

Please use the exact number on the measuring tape to select the size from the table below. If you are between sizes, or have larger hands, please select the bigger of the two sizes to make sure your bracelets will fit you comfortably.
